

Setting for DNS suffix registration (Windows Only)

Registration of DNS suffix is needed to authenticate the license of Microsoft OS and Office products automatically.

Please register DNS suffix in the following procedure.

1. [Start] (Windows icon) - [Windows System] - [Control Panel]
2. [Control Panel] - [Network and Internet] - [Network and Sharing Center] - [Change adapter settings]
3. Right click on [Ethernet] or [Local Area Connection] and select [Properties].
*If you use campus wireless network, right click on [Wi-Fi] or [Wireless Network Connection] and select [Properties].
Select [Internet Protocol Version 4(TCP/IPv4)] and click [Properties].
Click [Advanced].

4. Select [DNS] tab and check [Append these DNS suffixes] then click [Add].
Enter **cc.sophia.ac.jp** in [Domain suffix] and click [Add].
Check the correct DNS suffix name has entered, and then click [OK].
